Professional Summary

React and React Native Developer with 2 years of professional experience building healthcare, retail, mobile, and full-stack applications. Skilled in TypeScript, React, React Native, Next.js, GraphQL, TanStack Query, Supabase, Node.js, MongoDB, and PostgreSQL with a strong focus on scalable and user-centric solutions.

Skills

Frontend: React.js, React Native, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Material UI
State/Data: TanStack Query (React Query), React Hook Form, GraphQL, CRUD Operations
Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth, Socket.io
Databases: MongoDB, PostgreSQL, Supabase
Concepts: Reusable Components, Form Validation, API Integration, Performance Optimization
Tools: Git, GitHub, Postman, VS Code, Vercel

Professional Experience

React Developer | [Mile9](#) Jan 2026 – Present

- Maintained and enhanced a healthcare platform serving 10,000+ customers across 500+ centers.
- Contributed to a retail mobile application serving 600+ users across 200+ shops.
- Delivered 5+ healthcare modules including Billing, Admin Panel, User Management, and Reports using React, TypeScript, Material UI, and GraphQL.
- Built 5+ Flutter screens for retail operations including Receiving, Cart, Product Editing, Unit Measurement, and Invoice Management.
- Engineered 15+ form-driven CRUD workflows using React Hook Form and GraphQL.
- Integrated 50+ GraphQL queries and mutations alongside REST-based authentication APIs.
- Improved development efficiency by creating 20+ reusable components used across 10+ application screens.
- Participated in code reviews and requirement gathering to deliver production-ready features.

React Developer Intern | [Mile9](#) Nov 2024 – Jan 2026

- Crafted responsive React interfaces and reusable UI components for healthcare workflows.
- Integrated REST and GraphQL APIs and resolved production issues across multiple CRUD modules.
- Collaborated with senior developers to enhance application usability and feature delivery.

Projects

Real-Time Chat Application *React Native, Supabase, Socket.io* [Frontend](#) [Backend](#)

- Architected a real-time messaging application supporting personal and group conversations across 10+ screens.
- Enabled audio and video calling capabilities using Socket.io and managed 20+ real-time events.
- Added image and video sharing, stories, profile management, read receipts, notifications, and user presence.
- Leveraged Supabase Authentication, Database, and Storage for scalable user and media management.

Local Video Player Application *React Native* [Github](#)

- Created a React Native video player supporting subtitle playback, folder browsing, gesture controls, playlists, ZIP extraction, multi-select, sharing, and file management.
- Preserved playback history to resume videos from the last watched position.
- Optimized media scanning and navigation for collections containing 2,000+ videos.
- Distributed APK builds to 10+ users for real-world testing and feedback.

E-Commerce Platform *Next.js, Node.js, MongoDB* [Github](#)

- Engineered a full-stack e-commerce platform with 15+ pages using Next.js, Node.js, and MongoDB.
- Incorporated authentication, product management, shopping cart, order workflows, and admin functionalities.
- Integrated Razorpay payment gateway and deployed the application on Vercel.

Education

Bachelor of Arts (B.A.)
Burdwan University

2025
